PREFINISHED ALUMINUM SHEET PRODUCT CHARACTERISTICS

PREPAINTED

Prepainted Finishes offer extreme durability in outdoor exposure as well as indoors because of our high-quality paint system. **WRISCO** prepainted aluminum sheet finishes are uniquely designed in that they offer a hard, abrasive resistant coating, yet allow the flexibility for extensive forming and fabricating.

ANODIZED

Anodized Finishes offer an exciting breakthrough with 2-step continuous coil anodizing. This state-of-the-art process provides color uniformity and long life for exterior use. The benefits of this process are:

- Improved Color Consistency
- Improved Brake Forming Characteristics
- Fade And Abrasion Resistant
- Cost Savings Versus Batch Anodizing

BRIGHT ANODIZED

Bright Anodized Finishes use brightening treatments to maximize reflectivity and achieve desirable light reflection characteristics. The benefits to this reflective finish are:

- Fade Resistant
- Rated For Exterior Applications
- Formability
- Versatility For Design

FLUROPON – KYNAR

Fluropon – Kynar Finishes offer long life durability and are excellent for forming and fabrication. The benefits that Fluropon – Kynar provide are:

- Excellent Color Consistency
- Long Life Durability
- Resistant To Most Damaging Pollutants

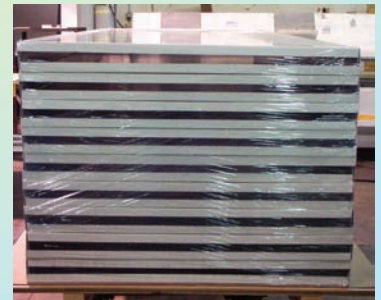

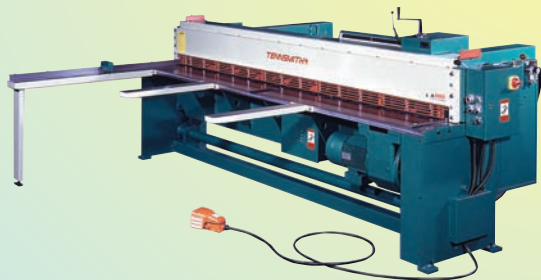

Wrisco Industries Inc.

CUSTOM COMPUTERIZED SHEET METAL FABRICATION

THE ONE-STOP METAL SUPPLIER AND FABRICATOR!

WRISCO INDUSTRIES INC. can benefit your business with custom computerized sheet metal fabrication to your exact specifications on *our state-of-the-art RAS Turbobend Plus metal forming brake system!* Wrisco offers custom computerized brake formed parts up to 10' in length. In addition, Wrisco can now provide you with 12' fabricated parts on *Wrisco's new 12' Tennsmith Brake!* Once again, Wrisco leads the way to satisfy your needs with 12' capabilities. Custom shearing or slitting up to 12' in length, custom notching up to 6", closed or open hemming are just a few of the services Wrisco can provide your company!

All you need to do is provide Wrisco with your exact measurements and Wrisco will fabricate the piece to your precise specifications! Imagine, quality parts and quick turnaround at a competitive price! Just fax us your drawings and begin saving time and money with Wrisco today!

- Custom widths and lengths – quick turnaround and no surcharges
- All colors available – certain minimums apply
- Matching painted pop rivets available to finish your letters

ALPOLIC® ACM ALUMINUM COMPOSITE MATERIAL

WRISCO INDUSTRIES INC. is a proud distributor of **ALPOLIC®'S ALUMINUM COMPOSITE MATERIAL (ACM)**! ALPOLIC® panels are available for both exterior and interior applications, and have been used extensively in exterior architectural applications such as building fascia, cladding service station canopies, storefront entryways and column covers. ALPOLIC® is also the ideal choice for signage, store fixturing, food service merchandisers, kiosks, POP displays, trade show exhibits and fascia systems. ALPOLIC®, produced by Mitsubishi Chemical America, Inc., is the world leader in aluminum

composite material technology. ALPOLIC® is produced by bonding two thin sheets of aluminum continuously under tension on either side of an extruded thermoplastic core. The aluminum surfaces have been prefinished, coil coated prior to lamination in a variety of paint finishes. ALPOLIC® aluminum composite panels retain remarkable tensile strength and deliver superior flatness, rigidity and stability under changing thermal conditions. Since they are lightweight and easy to attach, ALPOLIC®'s panel system has proven itself to be the perfect system for building cladding.

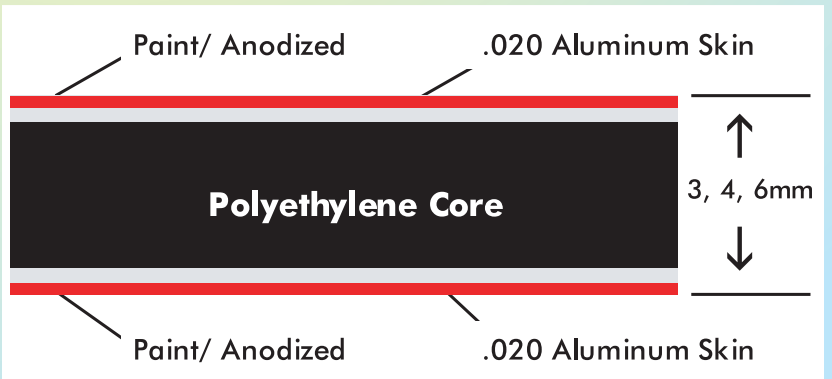

ALPOLIC® speeds construction times and cuts costs in labor and materials alike. ALPOLIC® provides an ACM that offers the rigidity of heavy gauge sheet metal in a lightweight aluminum faced composite material. ALPOLIC® offers superior flatness, vibration dampening, extreme durability and ease of maintenance.

ALPOLIC® is available in both polyester and Megaflon® finishes. PPG/Megaflon® is a high performance second-generation fluorocarbon finish that offers the distinct advantages of vibrant colors and multiple gloss levels. A wide array of colors are accessible to meet any job requirement. More than fifty corporate identity program stock colors are available in addition to eight architectural stock colors. Custom color matching can be performed. Minimums are required. **Call Wrisco now!**

ALPOLIC®

ALPOLIC® ACM LT Is Available In .010 Aluminum Skin & 2mm Thickness.

ALPOLIC® ACM ALUMINUM COMPOSITE MATERIAL

WRISCO INDUSTRIES INC. can provide you with Aluminum Composite Material (ACM) from the industry leader! **NOW YOU HAVE A CHOICE!** Take advantage of ALPOLIC®'s high quality and **Wrisco's** superior service and greatly benefit your next design project today!

Wrisco stocks ALPOLIC®'s service station canopy corporate identity program colors and white. All ALPOLIC® standard stock and preformulated products are available through **Wrisco**.

In addition, **Wrisco** can offer your design project unique architectural finishes such as ALPOLIC®'s Stone Series Composite: marble and granite; Textured Composite: stucco, wood grain and leather; Exotic Metal Composite: copper, stainless steel, titanium and zinc and Store-front Decorative Metal Composite: high polished, brushed and anodized.

ALPOLIC® requires no special tools for fabrication; ordinary woodworking and metal working tools are all that are needed. Fabrication techniques are easily accomplished by cutting, shearing, grooving, punching, drilling, bending and rolling. Fabricate sharp angle bends by simply routing or cutting either a "V" or "U" groove in the ALPOLIC® to create the required bend. ALPOLIC® can also be easily curved by using a press brake, roll bender or pipe fixture. There are several attachment concepts for installing panels — consider each individual application and utilize the system that best compliments your design project. ALPOLIC® can be joined using threaded fasteners, rivets, adhesives and double-faced high strength tapes — proper consideration should be given to the thermal expansion characteristics of ALPOLIC®. ALPOLIC® can be screen printed with an epoxy-base or urethane base two-part ink/paint system. In addition, pressure sensitive vinyl graphics can be applied worry-free.

For more information on ALPOLIC®'s Aluminum Composite Material, visit **Wrisco's** web site www.wrisco.com or ask your salesperson for the free ALPOLIC® Information CD-ROM!

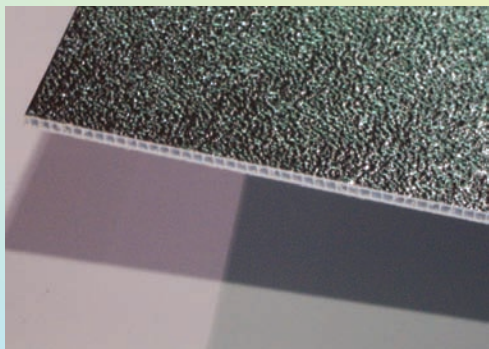

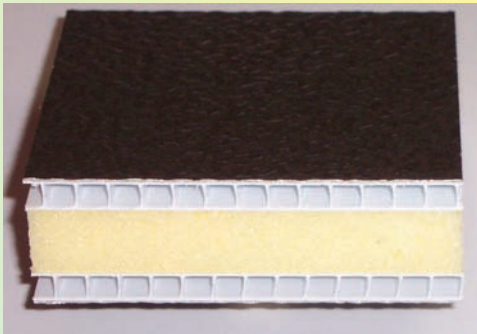

STOREFRONT WALL PANELS

WRISCO INDUSTRIES INC. can benefit your storefront business needs with our high-quality prefinished painted or anodized aluminum laminated storefront wall panels. **Wrisco's** panels are designed for walls, ceilings, partitions, fascias, mansards, signage or any number of additional uses and applications. **Wrisco's** storefront panels are PVC masked aluminum sheets laminated both sides on a variety of substrates to best suit your specific job requirements. **Wrisco** provides a time and money saving panel that the competition just can't beat! You deserve the best – **the best is Wrisco!**
