- Lightweight and Durable.
- Better than MDO
- Flame Resistant
- Covered by a Five-year Limited Warranty.
- "UL Recognized Component"® 

*As a sign maker, you've learned a lot about typefaces, colors, sizes, shapes, graphics, and much more. You work hard and your signs show you do good work. However, demands on your time are high, and deadlines have a way of edging up on you. How to get more done in less time is a puzzle that has challenged great minds for centuries.*

*At NUDO Products, we understand your needs for both creativity and efficiency. That's why we're proud to offer a special product that pieces together all the advantages you need.*

#### ENHANCED APPEARANCE

QUALITY CONSTRUCTION shows in our attractive pre-finished sign panel with a white painted aluminum surface ready for your sign paint, inks or vinyl graphics. Call for our selection of available colors, or you can choose the epoxy primed surface for repainting in your special custom color. Either way, Nu-Alum sign panels are lightweight, rigid and durable. Our professionally-crafted product is made of lauan faced exterior grade plywood with a laminated .013 aluminum surface on one or two sides. Other one sided panels available with factory backer. Tempered hardboard and other substrates available. Nu-Alum sign panels come shipped with a peel-off film to protect board surface until ready for use.

#### FASTER TURNAROUND

Nu-Alum sign panel's high-quality, baked enamel polyester wax-free coating is ready for immediate use. No prep time needed. Ask us about the various dimensions and weights of our panels. Even cutting panels is easy with a 20-24 tooth carbide tipped blade.

#### EASIER CHANGES

OUR DURABLE, fade-resistant surface makes vinyl re-lettering simple. So you can change your sign again and again.

#### BETTER WARRANTY

WHILE OTHERS OFFER one-year protection, Nu-Alum sign panels are covered by a limited five-year warranty. We carry a life-time warranty on the aluminum bonded to the substrate. If for any reason this bond fails, we will replace the panel. Nu-Alum panels are recognized under the Component Recognition Program of Underwriters Laboratories Inc. 

**NUDO** PRODUCTS recognizes that features alone won't amount to anything if they don't all come together to your benefit. So we continue to make reliability and dedication a commitment. And then we take our efforts a step further. We strive to lessen your challenges through innovation. Try our pre-finished sign panels. We think you'll agree, Nu-Alum sign panels can help you increase your profits and decrease time worries through increased productivity.

#### DIRECTIONS

Nu-Alum sign panels should be conditioned prior to painting with a multi-solvent cleaner (Gon, wax & grease remover, Pre-Kleeno, or Prep-Sol). Wipe with cleaner, then wipe dry. Use only quality sign paint such as lettering enamel or Bulletin paint. Always test panels prior to producing a finished product. No preparations are needed when applying vinyl letters or graphics other than wiping panel clean. Never use Laquer Thinner as a cleaning agent.

Nu-Alum sign panels are cut on four sides and ready to seal. If panel edges are to be painted, core voids can be easily filled with wood filler or other similar gap fillers. Sand and prime before applying the finishing coats of paint. Or use our hassle-free caps. Simply miter cut or notch and wrap corners. Run a bead of our sealant down inside of capping. Place capping on panel and wipe off any excess sealant.

Product No. *	Thickness & Description	Sizes
SN1P500-Poly-PF	1/2" Ply Alum (1 Side)w/poly backer	4' x 8', 10'
SN1P500-D-PF 2	1/2" Ply Alum (2 Sides)	4' x 8', 10'
